WHAT’S IN A FLOWER: Student Lab Sheet

Column 1
What do you think you will find in a flower?

What is the purpose of a flower?

Draw a picture of your flower and number its parts.

Column 2
Pull off parts of the flower. Number each item below to correspond to the numbers in your picture to the left. Write a description of that item next to the number. (If you know the names and functions, include those as well.)

Column 3
Glue each part here. Number each part as it corresponds to the description in Column 2. Using reference material find the correct names and functions, and write it next to each part.
