Agricultural Scientist, specializing in crop production:

BioAtlantis Ltd. is expanding and recruiting world class talent in our quest to become a global player in the biostimulant and nutraceutical sectors. We are recruiting a talented Agricultural Scientist, specialized in crop production, plant physiology and agronomy. The successful candidate will join the R&D team and will play a key role in the development of new technologies and products to enhance crop yield and tolerance to stress. The role involves a number of cutting edge collaborations between BioAtlantis and major universities worldwide, including EU Horizon 2020 projects. The position is located in Tralee, Co. Kerry, Ireland.

Duties & responsibilities

• To establish robust experiments in the area of abiotic and biotic stress resistance, plant strengthening and plant nutrition.
• To work on plant-microbe interactions and biological control.
• Performing greenhouse, polyhouse and field trials.
• Statistical analysis and report writing.
• Crop trial management, prepare and present research data.

Skills:

• Agronomic knowledge in crop production.
• Experimental and trial design.
• Strong statistical expertise.
• Excellent communication skills, both verbal and written.
• High organized and capable of creating and managing complex databases.

Qualifications & Experience:

• BSc. in Agricultural Science, specializing in plant physiology, agronomy and crop science.
• Strong knowledge of plant health, nutrition and commercial crop production.
• Prior work experience in designing and implementing crop trials is preferred.
• Experience in statistical analysis and report writing is also preferable.

To apply:
Please submit a cover letter and CV to hr@bioatlantis.com by close of business on 15th March, 2018 quoting this website and mention the position you are applying for.
