PhD student, Postdoc, and RA positions at Hong Kong Baptist University to work on NAD-capped RNAs

The laboratory of Prof. Yiji Xia in Department of Biology at Hong Kong Baptist University is seeking a PhD student, postdoc, and research assistant to work on NAD-capped RNAs and their functions in photosynthesis, plant immunity, and oxidative stress responses. For more detail on the related research, please see our recent publications: Zhang et al, 2019, PNAS 116:12072-77; Li et al, 2019, Plant Journal, https://doi.org/10.1111/tpj.14476. The successful candidates should have strong training in molecular biology, biochemistry, or bioinformatics. Applicants should send the following materials by email to Yiji Xia (yxia@hkbu.edu.hk): CV, letter of research interest, 1-3 representative publications, and three reference letters or names and contact information for three references.
