Postdoctoral Associate - Purugganan Lab
New York University
NYU Center for Genomics and Systems Biology

Open Date
Oct 31, 2019

Description
The Purugganan Laboratory has an opening for postdoctoral associate scientists to work on functional genomics and molecular biology of rice at New York University. The research projects focus on identifying and characterizing genes associated with environmental adaptation in rice. Candidates should have a Ph.D. with molecular biology skills and an interest in environmental and/or evolutionary questions. Candidates should have a strong record of research productivity, and able to work semi-independently.

The position is based in the NYU Center for Genomics and Systems Biology, in downtown Manhattan and will be part of a thriving research community that includes colleagues working on a broad range of topics. The pay is competitive, and starting dates are flexible.

Qualifications
A Ph.D. and/or experience in population and/or evolutionary genomics.

Application Instructions
Interested candidates should apply with a letter of interest and CV. Please send an email expressing interest to mp132@nyu.edu and also apply Here
