Independent Research Fellowships, University of Oxford, Department of Plant Sciences

The Department of Plant Sciences at the University of Oxford can support the best early career researchers to apply for an independent research fellowship: BBSRC Discovery Fellowship; BBSRC David Phillips Fellowship; Royal Society University Research Fellowship; NERC Fellowship; and ERC Starting Grant. The Department applies an annual deadline for the receipt of information from potential candidates for these fellowships. It welcomes interest from early career researchers in all areas of plant biology, including those at interdisciplinary boundaries with the physical or medical sciences who may draw on the outstanding breadth of Oxford’s research environment. To express your interest, please email the following three documents to fellows@plants.ox.ac.uk: (i) an up-to-date CV, (ii) a two-page research proposal, and (iii) a completed IRF cover sheet downloaded from https://www.plants.ox.ac.uk/independent-research-fellowships

Please submit all three documents by Friday 13 March, 2020.
