Graduate Student Position in the Yoon Laboratory at Purdue University

The Yoon lab in the Department of Botany and Plant Pathology at Purdue University has one open position for Plant Molecular Biology/Biochemistry graduate studies to conduct research in the gaseous plant hormone ethylene function using the model plant Arabidopsis thaliana and rice. Students with excellent research experience in plant molecular biology and biochemistry are strongly encouraged to apply. For application consideration, candidates are recommended to send a resume (curriculum vitae), a brief description of research experience/interests, and the contact information for three references to Dr. Gyeong Mee Yoon by email at yoong@purdue.edu. For more information about the Botany and Plant Pathology department and the research in Yoon lab, please see: https://ag.purdue.edu/btny/Pages/default.aspx and https://ag.purdue.edu/btny/Pages/Profile.aspx?strAlias=yoong&intDirDeptID=10.
