POSTDOCTORAL RESEARCHER

A postdoctoral research position is available in the laboratory of Terry M. Bricker for the study of: 1) ROS production sites in the cytochrome $b_{6}f$ complex and Photosystem I, and/or, 2) the protein composition and structural properties of PS II assembly factors in higher plants. These questions will be addressed by high-resolution tandem mass spectrometry, isotopic labeling and protein crosslinking. Applicants must possess a Ph.D. in Biochemistry, Plant Biology, Microbiology, Molecular Biology or a related discipline. Anticipated hire date is on or after October, 1 2017, pending final approval. LSU is an equal opportunity/access institution with a commitment to diversity.
