PhD position in Plant Molecular Biology
University of Lausanne

A PhD position (80%) is currently available at the laboratory of Prof. Yves Poirier of the Department of Plant Molecular Biology, University of Lausanne. The project is aimed at understanding the regulation of the PHO1 protein in phosphate transport and the adaptation of plants to phosphate deficiency in the model plant *Arabidopsis thaliana* (Science 352: 986-990, 2016; Plant Physiol. 171: 632-644, 2016). The ideal candidate would have an experience in plant biology and molecular biology. Strong motivation is essential.

Application, including CV and the names and addresses of two referees, should be sent to Prof. Yves Poirier, Département de Biologie Moléculaire Végétale, Biophore, Université de Lausanne, CH-1015 Lausanne, or by email to yves.poirier@unil.ch. More information on the Department and the laboratory can be obtained on the web site http://www.unil.ch/dbmv.
