Post Doctoral Fellowship Arabidopsis Genetics/Epigenetics

Plant & AgriBiosciences Research Centre (PABC), National University of Ireland Galway

*Application deadline: November 22, 2017*

The Genetics and Biotechnology Lab of Prof. Charles Spillane at the National University of Ireland Galway seeks expressions of interest from postdocs interested to join the SpillaneLab (www.spillanelab.org) via a postdoctoral fellowship. The SpillaneLab seeks expressions of interest from dynamic postdocs or recent PhD graduates with proven research experience in Arabidopsis/plant genetics and epigenetics to join the existing research team.

Candidates are sought which are within 5 years of their PhD graduation, have a strong publication record, excellent lab and bioinformatic skills, and who can work well in a team environment. The SpillaneLab is seeking highly motivated and talented postdocs with excellent wet lab skills in Arabidopsis genetics and epigenetics, particularly in relation to topics such as genomics/epigenomics, metabolomics, genome editing, GWAS and high-throughput phenotyping. Candidates with additional skills in analysis of genomics/epigenomics datasets and with bioinformatics expertise (e.g. R, Python) are particularly welcome.

The deadline for expressions of interest is 22nd November 2017. Expressions of interest consisting of a CV, names and contact details of three referees, and a brief summary of research interests should be sent by email to charles.spillane@nuigalway.ie

Please put reference NUIG Postdoc 17 in subject line of your e-mail.
