Two year post-doctoral position in developmental biology

A two year post-doctoral position with the possibility for extension for additional year is available at Umeå Plant Science Center in the Bhalerao lab starting immediately to work on the role of cell wall components in the regulation of differential cell elongation in model plant Arabidopsis thaliana. The project builds on previous work in the lab: Gendre et al PNAS (2011), Boutte et al PNAS (2013) and Gendre et al Plant Cell (2013). The applicant must have a strong background in use of confocal microscopy, molecular biology and genetics. Experience of working with Arabidopsis is essential.

Umeå Plant Science Center (www.upsc.se) is one of the world leading centers for research in plant biology. UPSC has state of the art equipment in genomics, confocal microscopy, metabolomics and proteomics and excellent plant growth facilities. UPSC has 150 researchers including 50 post-doctoral fellows and equal number of Ph. D and Master students. UPSC has a very international environment with researchers from 37 countries. Umeå also provides close access to outdoor activities such skiing, hiking, kayaking, etc.

Interested applicants should send cv with statement of interest and description of prior research and names of 3 referees.
