Postdoctoral position in Plant Gene Network

Ma Lab
School of Life Sciences
University of Science and Technology of China

Applications are invited for a postdoctoral position in the laboratory of Dr. Shisong Ma in the School of Life Sciences, University of Science and Technology of China (http://staff.ustc.edu.cn/~sma/). The Ma lab aims to harness the power of biological big data to derive novel biological knowledge. The current focus is to use a combination of genomic, bioinformatics, and genetic approaches to dissect the plant gene network regulating nutrients uptake and utilization.

Highly motivated individuals with strong background in plant genetics and molecular biology are encouraged to apply. Previous experience of RNA-seq or ChIP-seq analyses will be highly advantageous. The position will be first enrolled for two years, and can be extended based on performance.

Please send a CV, a research statement, and names and contact information for 3 academic references to Shisong Ma (sma@ustc.edu.cn).
