Postdoctoral Research Associate Position at University of North Carolina at Charlotte

We are looking for a highly motivated postdoctoral research associate with a PhD in Plant Biology, Biochemistry, or related disciplines at the Department of Biological Sciences, University of North Carolina at Charlotte. We use wild soybean as our study system to dissect the genetic basis of complex traits variation related to agriculture and human health. We integrate omics, molecular genetics, biochemistry, and evolution to understand molecular mechanisms and evolution of trait of interest. Candidates with research experience in plant and pest interactions and/or systems biology are highly desirable. Please contact me at bsong5(at)uncc(doc)edu if you are interested.
