PhD position: The dynamics of O-GlcNAcylation in plants

A PhD position in plant molecular biology is available from September 2016 for three years (with a probationary period of 3 months), at the Department of Applied Genetics and Cell Biology, BOKU Vienna. Funding is provided by the Austrian Science Fund FWF.

Applicants should have a background in biochemistry and / or molecular biology, and an interest in plant research. Previous experience in working with Arabidopsis is an advantage, but not a requirement.

The student will be studying the dynamics of O-GlcNAcylation, with a focus on the response to environmental changes. The work includes a short research stay at the John Innes-Centre in Norwich, UK, in the group of our collaboration partner Dr. Vinod Kumar.

If you are interested, please send a letter of motivation, your curriculum vitae and contact details of at least two references to doris.lucyshyn(at)boku.ac.at
