Postdoctoral Research Associate at Shanghai Jiao Tong University

A postdoctoral research position is available in the School of Life Science and Biotechnology, Shanghai Jiao Tong University (SJTU). The successful candidate will be co-mentored by Drs Jianping Hu and Dabing Zhang, starting immediately or upon mutual agreement. We are seeking a highly motivated individual to work on the biology of plant energy organelles peroxisomes and mitochondria, and their roles in plant response to the changing environment, using Arabidopsis and Rice as model systems. Qualifications include a recent PhD in plant biology, cell biology, genetics, biochemistry, or a similar area, experience in standard molecular biology techniques, and proof of working independently and productively. Effective communication skills, including fluency in English speaking and writing, are also required. The duration for this position is two years, with the possibility of extension.

Interested individuals should send a CV, description of past research achievement and a brief statement of interest, as well as contact information (email and telephone numbers) for three references to Dr. Jianping Hu (huji@msu.edu). For further questions about this position please contact Jianping Hu (huji@msu.edu) or Dabing Zhang (zhangdb@sjtu.edu.cn).

The School of Life Science and Biotechnology at SJTU provides an excellent environment for research in modern biology and plant science. A competitive salary will be provided based on experience of the successful candidate.
