One Postdoctoral Position in Plant Epigenetics

Zhong Lab, University of Wisconsin-Madison

A postdoctoral position is available in the laboratory of Xuehua Zhong in the Department of Genetics & Wisconsin Institute for Discovery at University of Wisconsin-Madison (http://zhonglab.genetics.wisc.edu). We utilize a combination of molecular, genetic, genomic, proteomic, biochemical and structural approaches to understand the molecular mechanisms and biological roles of epigenetic modifications in plants. Highly motivated individuals with strong background in plant genetics, biochemistry and computational biology and a record of scientific productivity are encouraged to apply. Candidates with their PhD degrees within two years and at least one first-authored publication from their PhD work are required. Previous experience of genomic analyses (RNA-seq and ChIP-seq) will be highly advantageous.

Please send a CV, brief statement of research accomplishments and future research goals, and names and contact information for 3 academic references to Xuehua Zhong (xuehua.zhong@wisc.edu).
