Two Ph.D. Students Positions in the Dept. of Biotechnology at Yeungnam University, South Korea.

Two Ph.D. student positions are available in the research group of Molecular Physiology Laboratory (PI: Dr. Kwang-Hyun Baek, http://khbaek.weebly.com/).

Dr. Baek and his group investigate the roles and mechanisms of plant endophytic bacteria and horizontal gene transfer. The information of the beneficial genes are used to transform plants to have better nutritional values and stress resistances.

Excellent analytical and interpersonal communication skills, independent scientific thinking and planning are expected to conduct experiments in the cutting-edge technology-equipped laboratory. Dr. Baek’s laboratory is well known for friendly laboratory members with good-quality publications.

Please submit curriculum vitae with TOEFL (or IELTS) scores, names of contact information of two references and a brief description of research interests/experiences and career goals to Dr. Kwang-Hyun Baek: Email: khbaek@ynu.ac.kr. Due date: Oct. 18, 2015
