Two Foreign Research Professor Positions in the Dept. of Biotechnology at Yeungnam University, South Korea.

Two Foreign Research Professor Positions are available in the research group of Molecular Physiology Laboratory (PI: Dr. Kwang-Hyun Baek, http://khbaek.weebly.com/).

Dr. Baek and his group investigate two major research topics. One research area is the collection of plant endophytic bacteria and fungi for the elucidation of useful compounds, e.g., taxol, antibacterial compounds and new compounds. One foreign research professor will be needed for conducting the research project. The skills of natural products (isolation of compounds and NMR, etc.) are especially required.

The other research topic is understand molecular mechanisms of stress tolerance or induced disease resistance. For this research, any research background with good molecular biology skills will be encouraged to apply for the job opening.

The foreign professor will be provided salary, small apartment rental fee and health insurance. In addition to the salary, he/she will be awarded bonus based on the publication records. The foreign professor will be asked to teach one class annually.

Excellent analytical and interpersonal communication skills, independent scientific thinking and planning are expected to conduct experiments in a cutting-edge technology-equipped laboratory. Dr. Baek’s laboratory is well known for friendly laboratory members with good-quality publications.

Please submit curriculum vitae, names of contact information of two references and a brief description of research interests/experiences and career goals to Dr. Kwang-Hyun Baek: Email: khbaek@ynu.ac.kr. Due date: Nov. 20, 2015
