POSTDOCTORAL RESEARCH ASSOCIATE
VACANCY REF: 033473

HALLIDAY LAB, UNIVERSITY OF EDINBURGH
http://hallidaylab.bio.ed.ac.uk/

We are seeking an enthusiastic postdoctoral researcher to work on PHYTOCAL, a newly funded ERA-CAPs project [http://www.eracaps.org/] that is a three-way collaboration between the Halliday lab (lead, Edinburgh, UK), the Stitt lab (Golm, Germany) and the Nemhauser lab (Seattle, USA). PHYTOCAL seeks to understand for the first time how light signalling and carbon metabolism are coupled to control growth and biomass production in the model plant Arabidopsis. You should have expertise in plant light signalling, or circadian biology, or metabolism and an excellent publication record.

For further information follow the link below or contact Prof. Karen Halliday
