A Postdoctoral Researcher Position at Institute of Soil Science, Chinese Academy of Sciences

Ping Lan Lab is looking for a highly motivated postdoctoral researcher who will conduct the research on understanding the molecular basis of plants adaptation to nutritional deficiency (phosphate and iron starvation). This 5-year-project is supported by ‘the strategic leading special science and technology project of Chinese Academy of Sciences (XDB15030103)’. The candidate will study biological functions of selected candidate genes which induced under the nutritional deficiency.

The postdoctoral researcher should have strong knowledge and skills in plant molecular nutrition, genetics/genomics, yeast hybridization, and biochemistry, with good communication skills and scientific publications.

To apply, send a brief statement of research interest and a CV with the names of three references to Ping Lan (plan@issas.ac.cn). The position will be open until it is filled.
