A technician and a postdoctoral associate (PA) position are available in Xia Laboratory at Hong Kong Baptist University to study: 1) molecular mechanisms of stress responses in Arabidopsis, including the roles of epigenetic/transcriptional regulation and posttranslational modifications; or 2) protein translocation-vesicle trafficking mediated by posttranslational modifications. Successful candidates must be highly motivated and have a Master degree (for the technician position) or a PhD degree (for the postdoc position) in biology, chemistry, or a related field. A strong background in biochemistry/protein chemistry/proteomics or cell biology is preferred. To apply, please send a cover letter and C.V. to Prof. Yiji Xia via email at yxia@hkbu.edu.hk.
